

Helping your child REACH their full potential

Reach Assessments™ provide an independent insight into your child's learning.

Reach Assessments are the cornerstone of our Assessment Suite and provide schools with the data needed to support the best outcomes for students.

By providing an annual, independent and objective benchmark we give schools the tools to consistently track and measure student progress year-on-year. Our reports help schools to pinpoint areas of strength and identify areas of improvement assisting in tailoring teaching to each student's needs.

Delivers a consistent measure of student growth

Supports teachers' professional judgement and future planning

Provides comprehensive online reporting

Underpinned by international curricula
