Janison.

Replay.

iOS user guide

Contents.

1. Introduction

Janison Replay is a digital test delivery application that allows students to participate in the ICAS and Reach online assessments. Replay locks the device down so that the student can't access anything on their device outside of the app during the test.

Candidates undertake tests on Replay devices
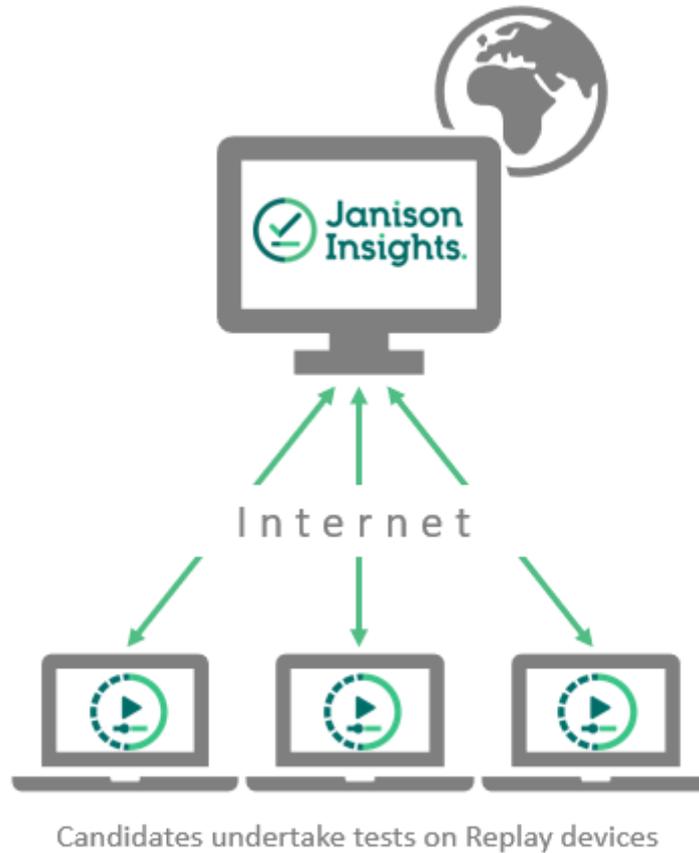

1.1 System requirements for Replay installation

👤 Hardware	🖥 Software	🎛 Internet speed
• iPad, iPad Air, iPad Pro • iPad mini is not recommended due to smaller screen resolution • Free disk space: 1GB+	• iPad OS 17+	• Download: 1024KB/s • Upload: 512KB/s+

2. Installing Replay in an iOS device

To install and configure Replay on an iOS device:

## 2.1   Install Replay

1. Download from the link below from

    Apple Store: https://apps.apple.com/au/app/janison-replay/id6470965376
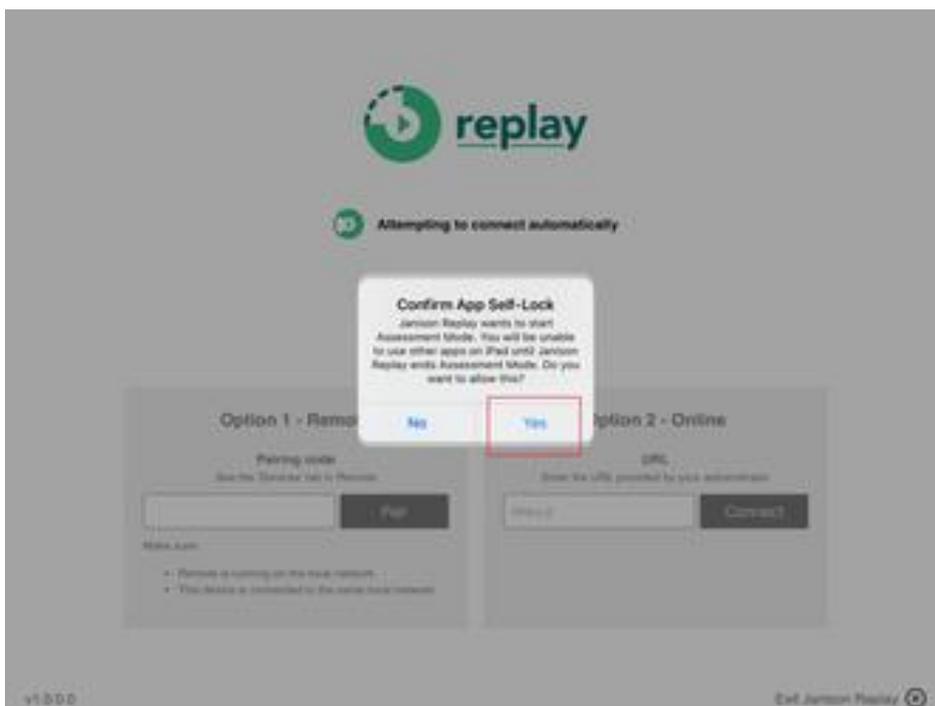

2. Or search on App Store:
    1. Search for **Janison Replay** and then select the **Get/Download** icon.

3. Select **Open** or lanch from home screen to open Janison Replay.

4. Select the Yes to lock the device from other apps.

2.2   Entering ICAS/REACH Assessments URL

After Replay is launched for the first time, select Option 2 Enter URL: icasassessments.janisoninsights.com
and select the Connect button. (This step is only required once after initial installation)

replay

 Attempting to connect automatically

Manually connect

Option 1 - Remote	Option 2 - Online
Pairing code	**URL**
See the 'Devices' tab in Remote	Enter the URL provided by your administrator

Make sure:

- Remote is running on the local network
- This device is connected to the same local network

v5.0.0

Exit Janison Replay ⊗

You should see the screen below.

3. The student experience

On the day of the test, launch Replay on each of the student devices.

The student will select **Start the Test**.

They will first need to enter the **Session Code**.

They will then need to enter their unique **Student Code**.
