## 1. Introduction

Janison Replay (Replay) is a digital test delivery application that allows students to participate in the ICAS and Reach online assessments. Replay locks the device down so that the student can't access anything on their device outside of the app during the test.

### 1.1 System requirements for Replay installation

| 🖨 Hardware  | 💻 Software       | 🌐 Internet speed                           |
|---|------------------|--|
| Desktop or laptop computer<br><b>(Not a tablet or mobile)</b><br><br>Recommended screen resolution: 1024 x 768px<br><br>Free disk space: 1GB+ | PC (Windows 10+) | Download: 1024KB/s<br><br>Upload: 512KB/s+ |

## 2. Installation

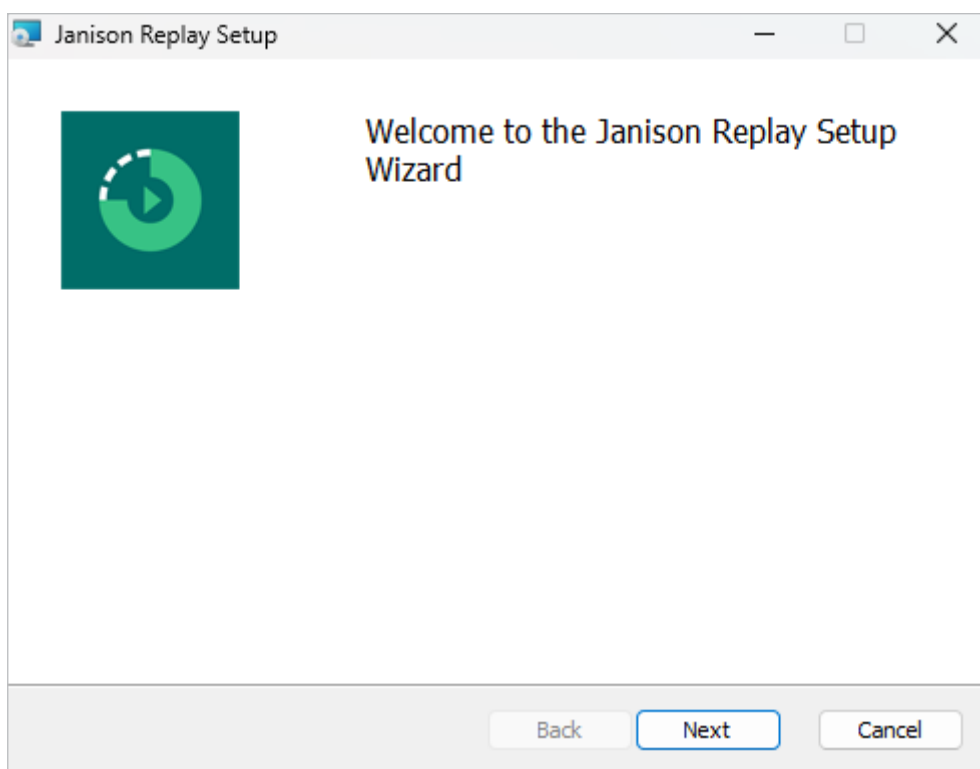

Technical specialists will need to install a copy of the app on each of the student devices.

**⚠ Important:** If you have previously installed Replay, you can install the new version over the existing one without uninstalling it first. If this is not successful, please uninstall the current version and then reinstall the latest version from the ICAS website (refer to Section 3 of this guide for instructions).

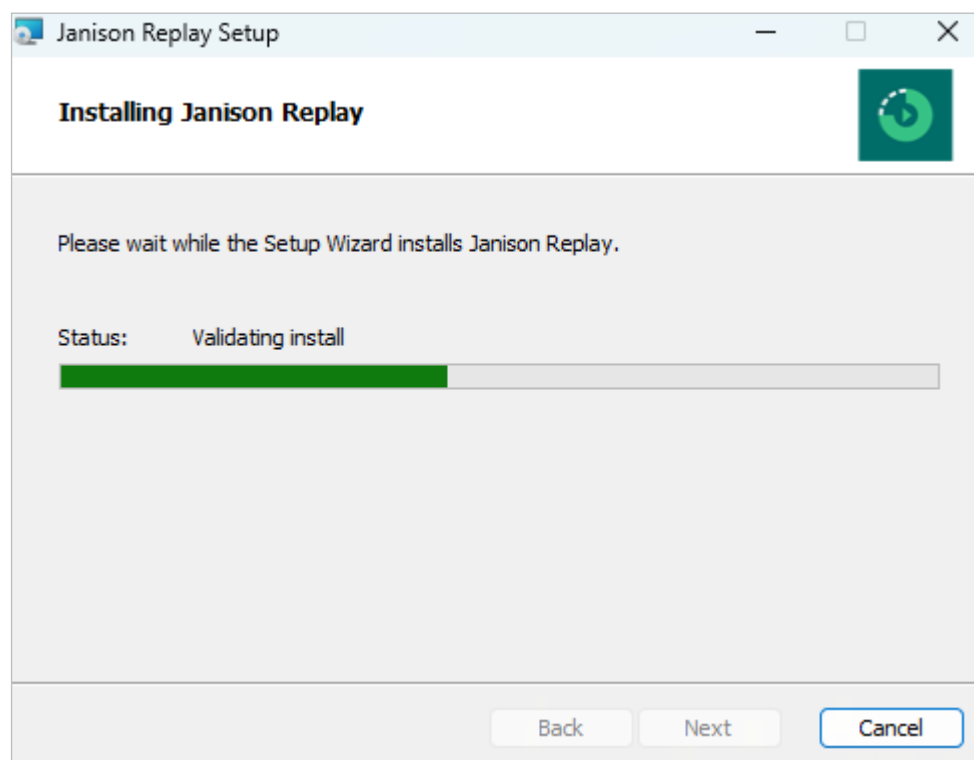

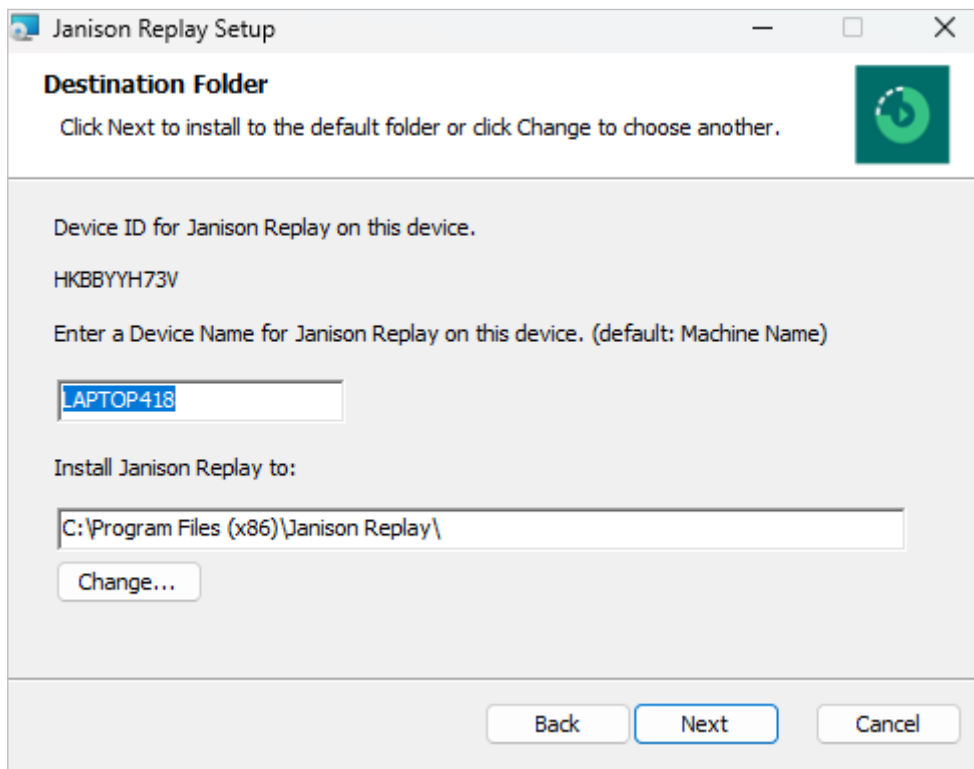

### 2.1 Install Replay

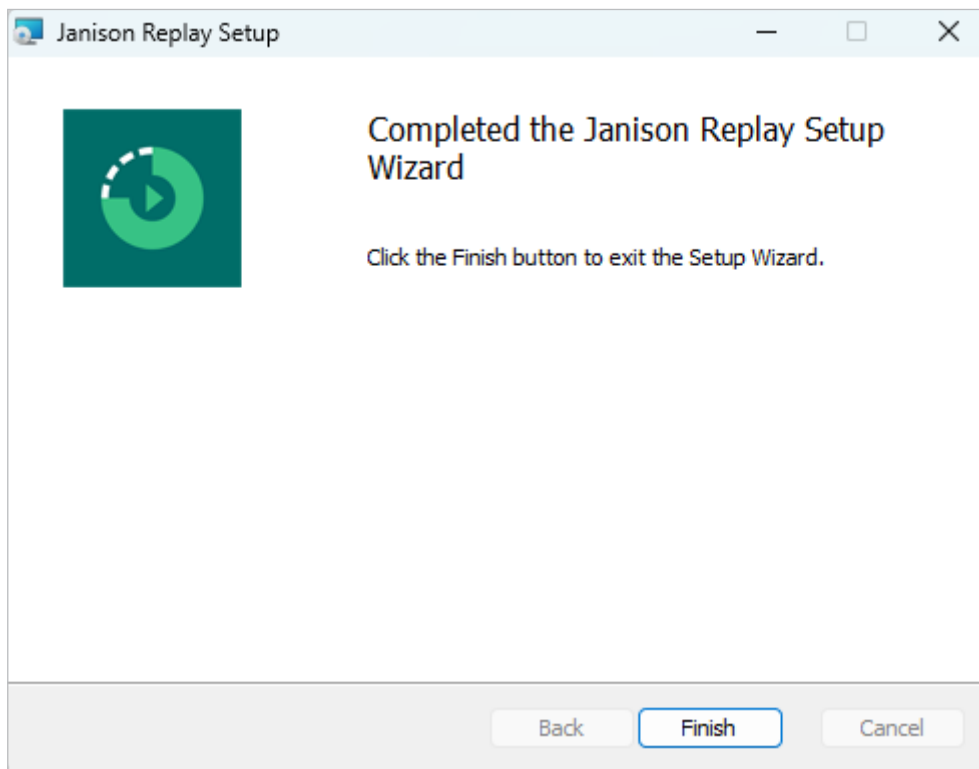

Next, you need to install the Replay app.

Double Click **Janison Replay v5.12.10.msi**, a setup assistant displays.

Select **Next** and select **destination** and then **install**.

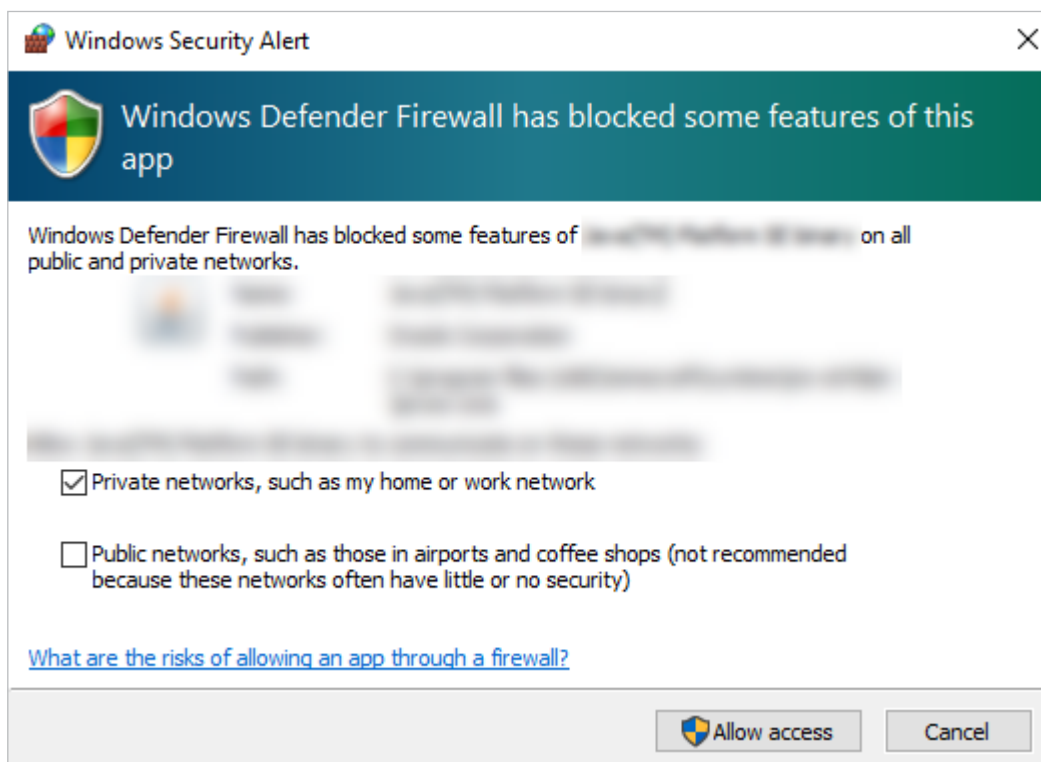

Once Replay has installed, select **Finish**. Launch Replay to ensure it loads.

Double-click the **Janison Replay** desktop shortcut to launch Replay.

## 2.2. Allow firewall access

If this is the first time launching Replay on a device, Windows may prompt you to allow Janison Replay to access the internet via the window computer's built in firewall.

When prompted with the above screen select **Allow access**.

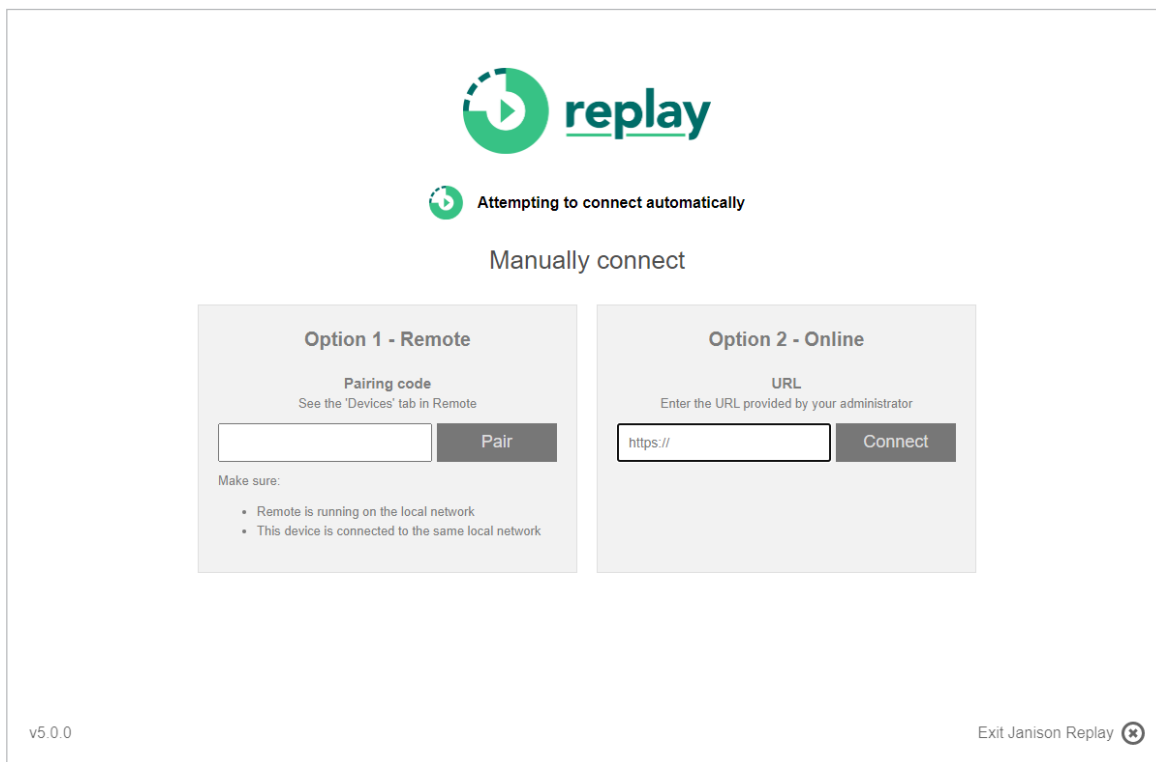

## 2.3. Entering ICAS/REACH Assessments URL is automatic now

After **Replay** is launched for the first time, it should automatically redirect you to the **ICAS Assessment platform** to start the Test. If this happens, **skip the steps below** and proceed directly to **start the test screenshot**.

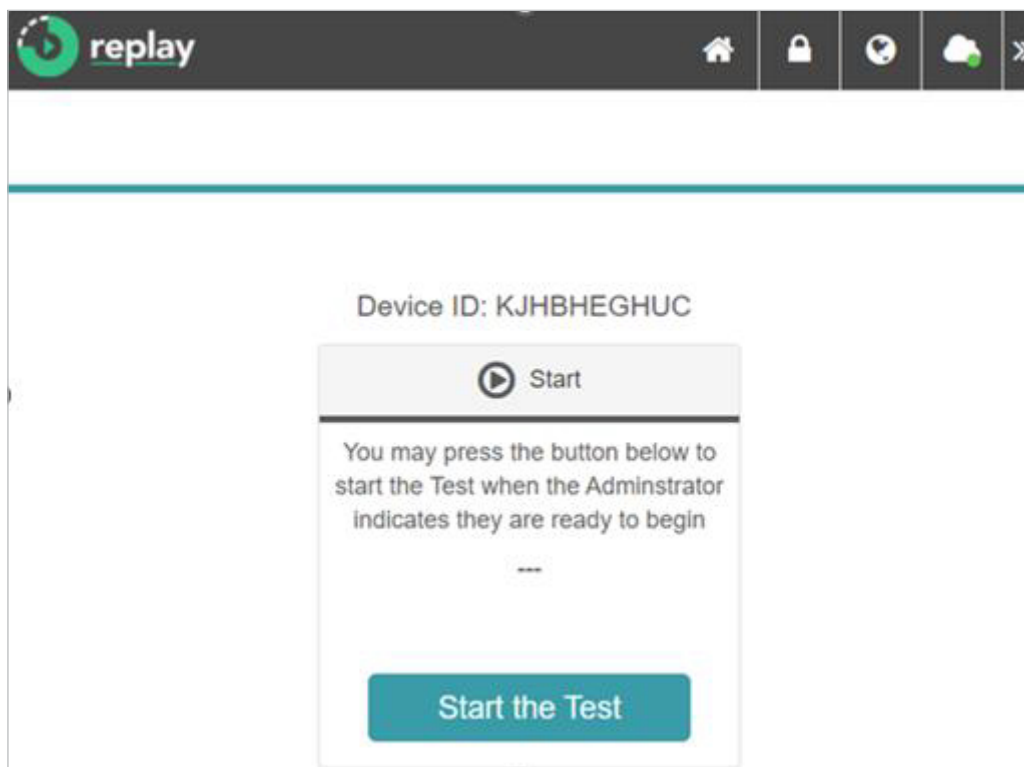

If you are not **automatically redirected** and instead see the screen shown below, follow these steps:

1. Select **Option 2 – Enter URL**
2. Enter: [icasassessments.janisoninsights.com](https://icasassessments.janisoninsights.com)
3. Select **Connect**.

**Note:** This step is only required once, immediately after the initial installation.

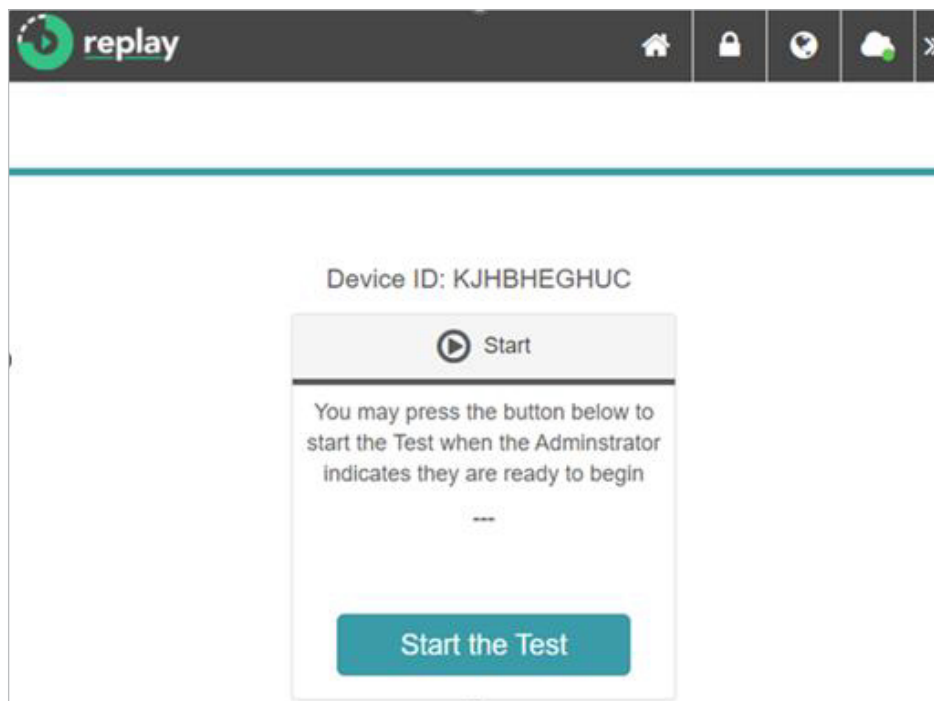

You should see the screen below.

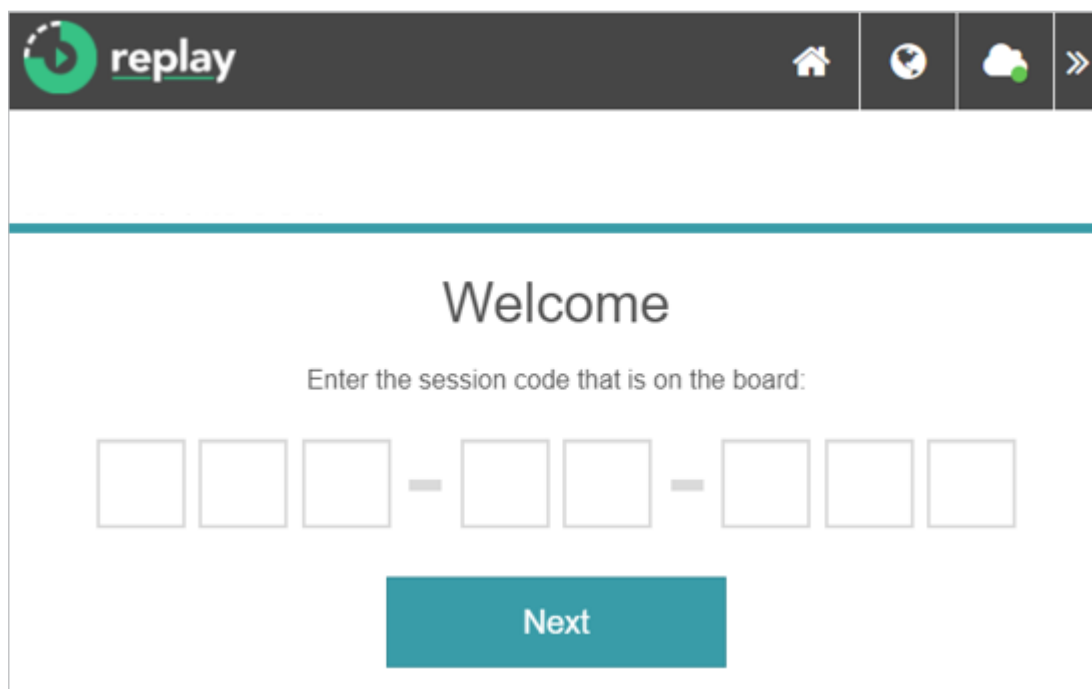

### 3. The student experience

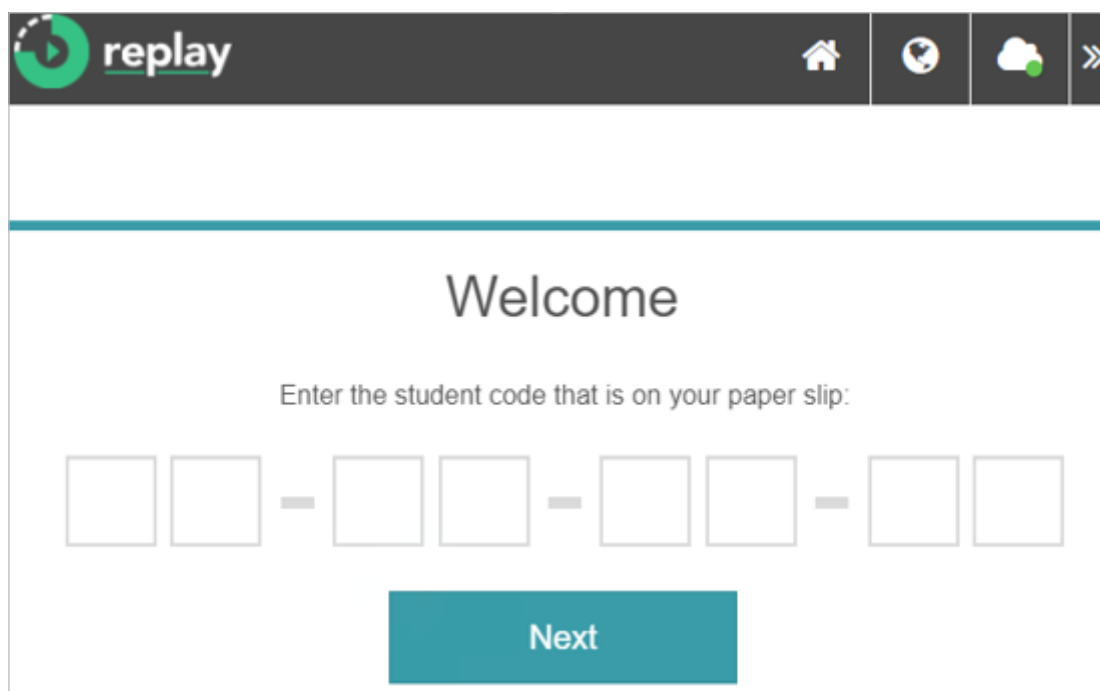

On the day of the test, launch Replay on each of the student devices.

The student will select **Start the Test**.

They will first need to enter the **Session Code**.

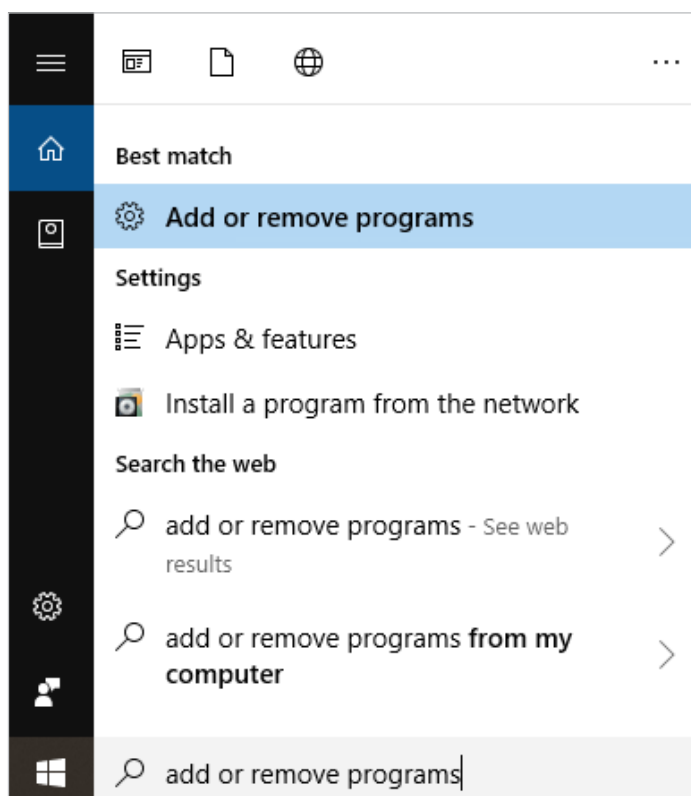

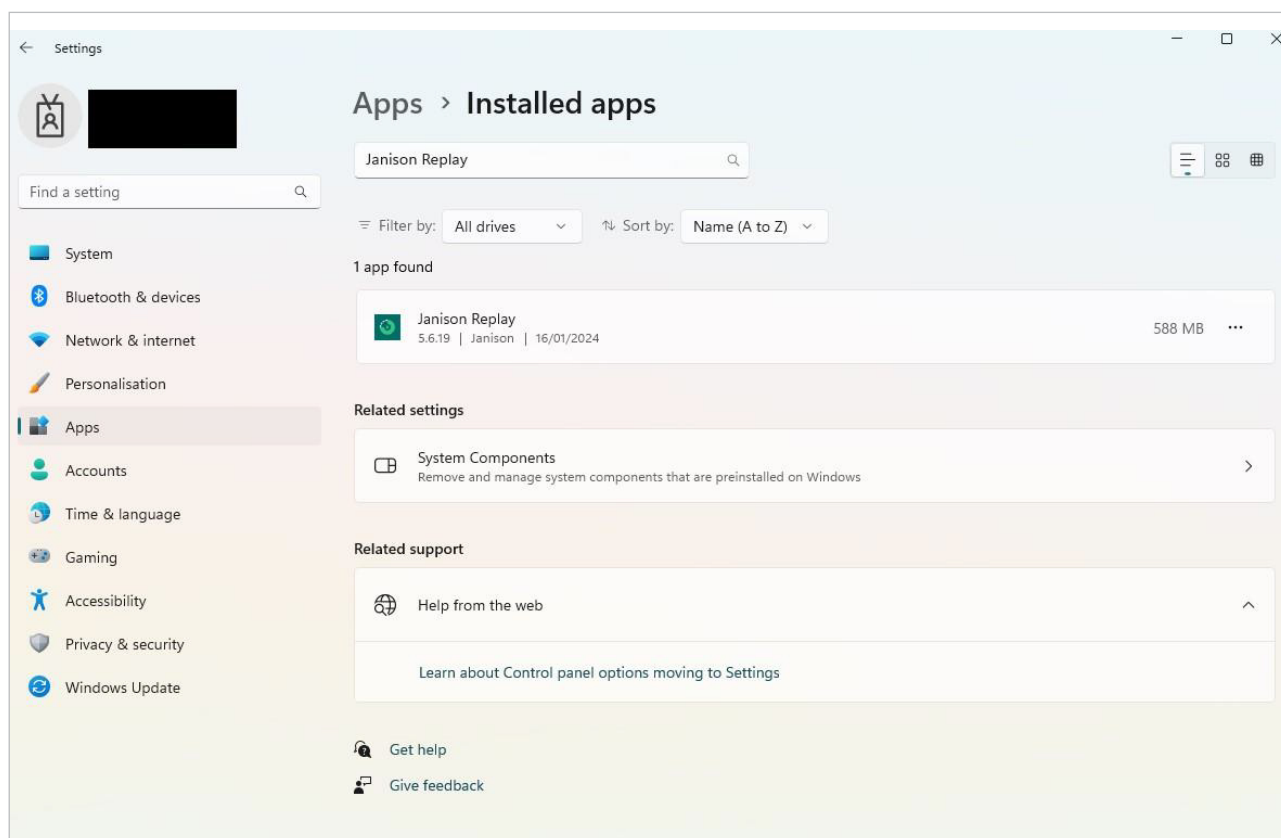

They will then need to enter their unique **Student Code**.

## 4. Remove Janison Replay from devices

### 4.1 Windows 10/11 removal instructions

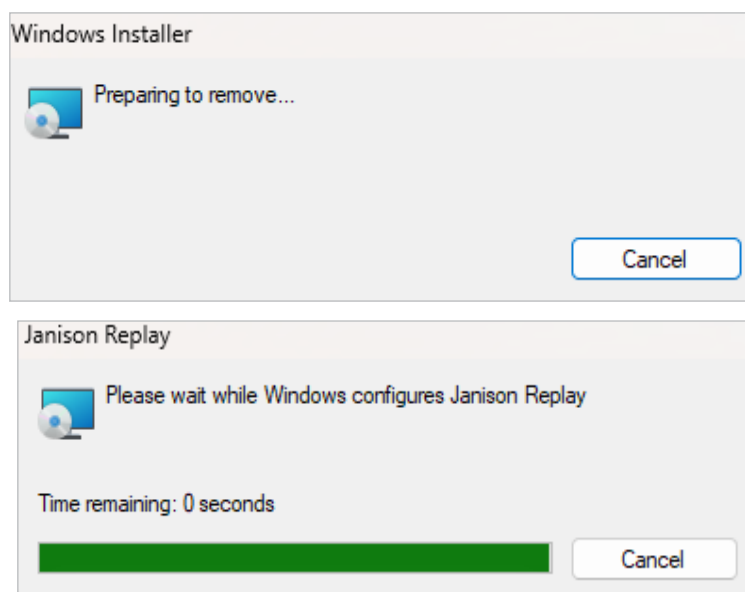

From the start menu open **Add or remove programs**.

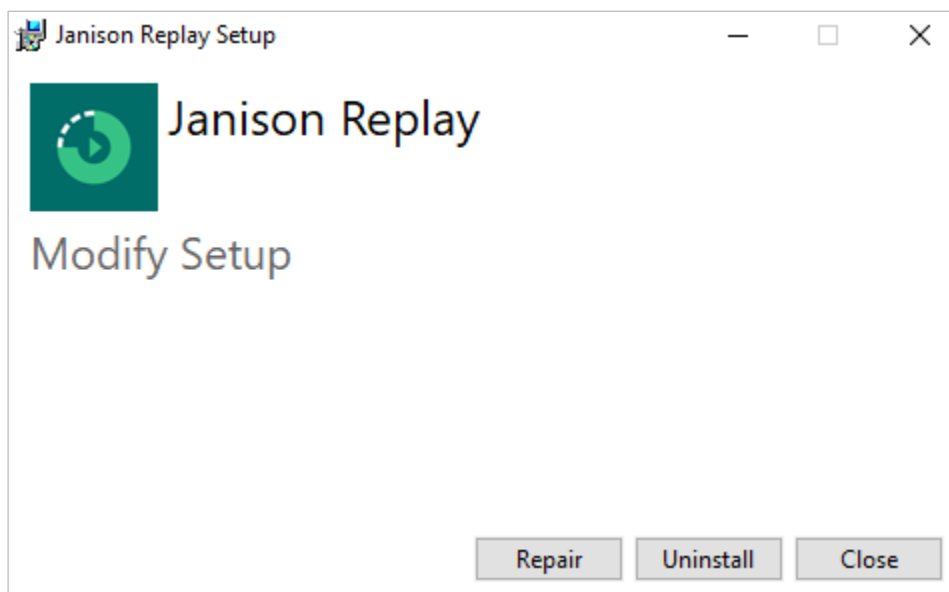

Search for **Janison replay**.

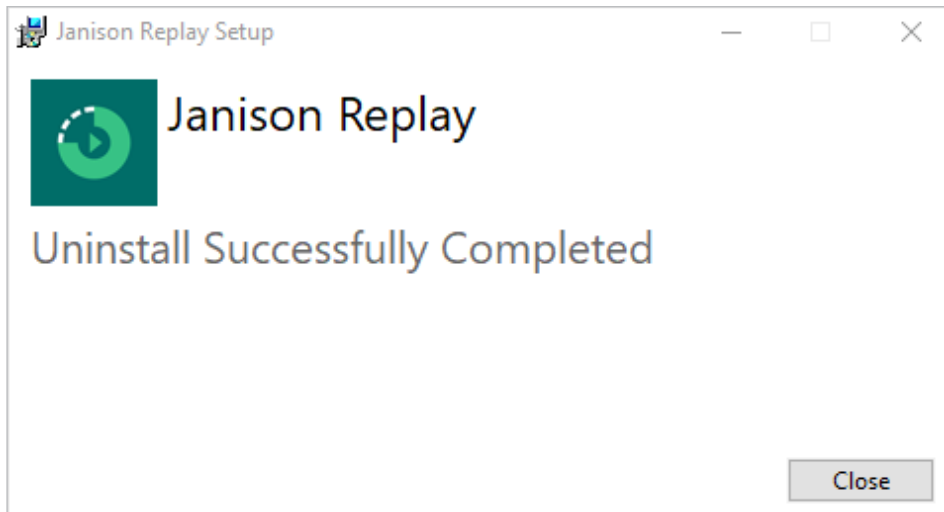

Select **Uninstall**.

Select **Uninstall**.

Replay uninstalls and feedback confirming the uninstall displays.

Confirm under **Add or remove programs**. Replay is not longer there.

The screenshot shows the Windows Settings application, specifically the 'Installed apps' section. At the top, the breadcrumb 'Apps > Installed apps' is visible. A search bar contains the text 'Janison replay' with a clear button (X) on the right. To the right of the search bar are three view options: list view (selected), grid view, and gallery view. Below the search bar, there are two filter and sort options: 'Filter by: All drives' and 'Sort by: Name (A to Z)'. A message states: 'We couldn't find anything to show here. Double check your search criteria.' Below this message are two sections: 'Related settings' and 'Related support'. Under 'Related settings', there are two items: 'System components' (Manage system components that are preinstalled on Windows) and 'AI components' (View AI components that are installed on Windows). Under 'Related support', there is one item: 'Help from the web'.
